**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 5 "the light emitting strips" has no antecedent basis. In claim 1, line 3 and in claim 3, line 4 the inclusion of the limitations of "soft or hard" in parentheses make unclear whether such limitations are being claimed.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hurwitz '467.

Note hat body 10, light emitting strip 12, battery 15 and control switch 16. With respect to claim 2 note that the strip 12 extends on two sides of the hat.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3765

6. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hurwitz '467 in view of Hurwitz '200. Note in Hurwitz '467 hat body 10, light emitting strip 12, battery 15 and control switch 16. Hurwitz '467 does not teach the hat body having a trench for receiving the light emitting strip 12. Hurwitz '200 teaches old the use of trenches or channels in a hat body for receiving light emitting strips (see paragraph [0118], line 2). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the safety hat of Hurwitz '467 with the channels/trenches of Hurwitz '200 to achieve the advantage of protecting the light emitting strips and maintaining the aerodynamic design of the hat.

#### *Conclusion*

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note particularly, the hat and light strips of Chien '946, European patent to Burrows, Tabanera, Chien '325, Murasko, Hurwitz '587, Chien '342, Su and Richardson.
